

Mobile review

Comments

1. Book now tab is on the centre, which is not ideal, keep the centre or hero screen for showing best image with content which create excitement to book instantly.
2. Book now is there but doesn't show any urgency and booking CTA is getting lost. Probably put a note or tag of (Starting at 599 tonight , or Only XX beds left, book now to claim discount of xx%, etc)
3. Black BG doesn't look very appealing should see the reference of Gostops, they have colourful logo, however have kept the BG white only check if this make sense.
4. Category – Hostels , Colive , Group

Comments

5. Font we should see some other options.
6. Too many colors, we should remove the BG flow of lights.
7. Make this section shorter since or can it be merged with room + amenities?
8. Currently the flow is :
 - a. Hero
 - b. Safety
 - c. Amenities
 - d. Rooms
 - e. Experience
 - f. Events
 - g. Reviews
 - h. CTA Again.

This is too long for mobile

Can we do :

Hero – Header (Hostels, Partner with us, Contact us , Long Stays)

Why Vibe House – Experience

Room + Amenities

Activities

Review

Then everything else like (Host a free event , Partner with us) etc.
